

Readme

World Scientific has produced a style/template document for MSWord, which will allow authors to prepare manuscripts that can be brought directly into the World Scientific production process for CRC titles. This will enable more accurate production of page proofs, reducing your need during proofreading to locate typographic mistakes.

Installing the style file

The World Scientific Word templates and sample files are located on the website in a zip format called **vjcs-doc.zip**. Download and unzip this. Once unzipped successfully, you will find the following files:

readme.doc : preliminary guide
ws-vjcs.doc : style/template file
ws-vjcs.pdf : sample typeset pages using ws-vjcs.dot template

Applying World Scientific styles to your documents

The World Scientific styles are listed below. To use a style, first select the text to which you would like to attach the style, then choose the style name from the Styles gallery. In addition, use the Table and Equation facilities available in Microsoft Word as required.

Style Name	Short cut Key	Style apply for
Article Title	Alt + A,T	Article Title
Author	Alt + A,U	Author
Affiliation	Alt + A,F	Affiliation
History		History
Abstract		Abstract
Keywords		Keywords
Heading 1–4	Alt + 1–4	Headings 1–4
Text, Text Indent	Alt + T,X Alt + T,I	Text, Indented Text
List	Alt + L,A Alt + L,B Alt + L,N	Alphabet list Bullet list Number list
Equation	Alt + Q	Equations
Reference	Alt + RF	References
Table, Table Caption	Alt + T,A Alt + C,T	Table body Caption
Figure Caption	Alt + C,F	Figure Caption
Footnote Text	Alt + T,F	Footnote
Appendix 1–3	Ctrl + 1–3	Appendix 1–3

Instructions

Illustrations and images

Please prepare all line drawings, halftones (gray scale) and colour illustrations in high resolution. The requirements are:

- (a) 600 dpi for line drawings (black and white)
- (b) 300 dpi for halftones (gray scale). Do not convert from colour images as they reproduce very poorly.
- (c) 300 dpi for colour images. Must be in CMYK (Cyan, Magenta, Yellow and Black) for colour separation. RGB (Red, Green and Blue) is unacceptable for colour separation work. Colour images to be printed in colour are allowed only as agreed in the contract.
- (d) Ensure all labels/annotations are sharp and clear for reproduction. Easy-to-read typeface/font like Arial, Helvetica or Times Roman are recommended for the labels.
- (e) To provide softcopy of the illustrations in either eps, ps, tif, jpg, gif or bmp format, preferable on a PC platform. All illustrations should be embedded in the text. At the same time provide the illustrations as individual files. Use the correct file names for each illustration, for example, John_fig1.eps, John_fig2.eps, or John_fig1.tif, John_fig2.tif.
- (f) If soft copies are not available, authors are requested to submit good original glossy prints for clear reproduction. Figure number must be clearly labeled on the back and preferably indicate which side of the figure is the top by using an arrow pointing upwards.

Miscellaneous

- (a) Please ensure that quotation marks are paired correctly, e.g. “good quotes” rather than ”bad quotes”.
- (b) Italicized words should not be done in Tex’s mathmode when using TeX and Latex2e. This will result in unusual character spacing. Use the proper control sequence of “\it”.
- (c) Use a hyphen (-) for compound words (e.g. ‘two-dimensional’), an en-dash (–) to link numbers, nouns or names (e.g. 220–240 Volts, electron–positron collisions, Einstein–Rosen–Podolsky paradox), and an em-dash (—) to link sentences or clauses — this is what we would regard as a ‘normal’ dash.
- (d) Note this set of common abbreviations:

Equation(s)	—	Eq./Eqs.
Figure(s)	—	Fig./Figs.
Reference(s)	—	Ref./Refs.
Section(s)	—	Sec./Secs.

Please spell in full if any of the above is the first word of the sentence.

- (e) Latin words are italicized, e.g.
et al., a priori, in situ, ibid. etc.

For help with the use of the World Scientific Microsoft Word style file, please e-mail to any one of the following:
